

Perception

Adam Pautz

Table of Contents

Introduction: The Puzzles of Perception and Why They Matter

1. First question: the character question
2. Second question: the location question for sensible properties
3. The plan for this book

1. The Sense Datum View: The Veil of Images

1. What is the sense datum view of experience?
2. The causal argument from hallucination for the sense datum view
3. The argument from sensible properties for the sense datum view
4. Interlude: sense datum view as a solution to the internal-external puzzle
5. Can the sense datum view accommodate the epistemic and explanatory roles of experience?
6. Does materialism undermine the sense datum view?
7. The percipi puzzle for the sense datum view
8. Puzzles about indeterminate and impossible sense data
9. Summing up

2. The Inner State View: Experiences as Modifications of Subjects

1. What is the inner state view of experience?
2. Arguments for the inner state view of experience
3. Does “transparency” undermine the inner state view of experience?
4. External directedness as a problem for the inner state view
5. How can the inner state view handle sensible properties?
6. Can the inner state view accommodate the epistemic and explanatory roles of experience?
7. Summing up

3. The Intentional View: Experiencing as Representing

1. What is the intentional view of experience?
2. How does the brain represent? Some versions of the intentional view
3. The transparency argument for the intentional view
4. The intentional view as the best common factor view
5. Some alternatives to the intentional view
6. How can intentionalists explain the explanatory significance of experience?
7. Are there counterexamples to the intentional view?
8. Intentionalism and the puzzle of the laws of appearance (HIGH LEVEL CONTENTS)
9. Does the intentional view even make sense?

10. Summing up

4. Do Experiences Represent the Real World? Varieties of Intentionalism

1. Response-independent intentionalism: Armstrong, Dretske and Tye
2. Do thought-experiments undermine response-independent intentionalism?
3. Empirical problems for response-independent intentionalism
4. The *percipi* puzzle revisited
5. Response-dependent intentionalism: Shoemaker and McGinn
6. Problems with response-dependent intentionalism
7. Irrealist intentionalism: Mackie and Chalmers
8. Problems with irrealist intentionalism
9. Summing up

5. The Return of Naïve Realism: Experience as Openness to the World

1. What is naïve realism?
2. The argument from explanatory role: John Campbell
3. The argument from explaining imagination vs perception: MGF Martin
4. The argument from act-object intuitions: William Fish
5. Can naïve realists adequately explain illusion and hallucination?
6. Can naïve realists adequately explain sensible properties?
7. Can naïve realism accommodate the role of the brain?
9. Naïve realism vs the intentional view: is there a conflict, and how to decide?
10. What is the modal status of a theory of experience?
11. Summing up
