About the Authors	xxiii
Introduction	xxv
CHAPTER 1	
Infrastructure – An Overview	1
1.1 Demand for Infrastructure	2
1.2 Sustainability and Infrastructure	7
1.2.1 Sustainability and sustainable development – a brief history	8
1.2.2 The need for sustainable infrastructure	9
1.3 Definition and Characteristics of Infrastructure	10
1.3.1 Differentiation of terms: project – asset – facility	13
1.3.2 Characteristics	15
1.3.3 Cross-sector characteristics	16
1.3.4 Types of infrastructure companies	16
1.3.5 Role of the private sector	18
1.3.6 Value chain elements	19
1.3.7 Greenfield versus brownfield investments	21
1.3.8 Yield-driven versus IRR-driven investors	22
1.3.9 Sources of revenue and financing	24
1.3.10 Competition and regulation	25
CHAPTER 2	
Infrastructure Investments	27
2.1 Infrastructure as an Asset Class	28
2.1.1 Investors in infrastructure	29
2.1.2 Risk-return profiles of unlisted infrastructure investments	33

2.1.3	Benchmarking infrastructure investments	40
2.1.4	Portfolio diversification through infrastructure	46
2.2	Sustainable Infrastructure Investing	56
2.2.1	Concept of sustainable investing	56
2.2.2	Why invest in sustainable infrastructure?	62
2.2.3	How to invest in infrastructure sustainably	64
2.2.4	Challenges of sustainable infrastructure investing	68
2.3	Approaches to Infrastructure Investing	69
2.3.1	Listed infrastructure investments	69
2.3.2	Unlisted infrastructure investments	73
CHAPTER 3		
	Organisational Model	87
3.1	Privatisation Models	87
3.1.1	Privatisation versus PPP	88
3.1.2	Formal privatisation	94
3.1.3	Functional privatisation	95
3.1.4	Material privatisation	96
3.2	Partnership Models	100
3.3	Business Models	102
3.3.1	Availability payment models	103
3.3.2	User-driven payment models	105
3.3.3	Direct-user payment models	106
3.4	Contractual Models	107
3.5	Financing Models	110
3.6	Interim Summary – Various ‘Privatisation Paths’	110
CHAPTER 4		
	Characteristics of Selected Infrastructure Sectors and Subsectors	113
4.1	Transport	114
4.1.1	Cross-sector characteristics	114
4.1.2	Road transport	118
4.1.3	Rail transport	125
4.1.4	Air transport	133
4.1.5	Water transport	141
4.1.6	Sustainability considerations	149
4.2	Water Supply and Sewage Disposal	152
4.2.1	Characteristics and organisation	152
4.2.2	Sources of revenue and value chain elements	158
4.2.3	Competition and regulation	160
4.2.4	Private-sector involvement	161
4.2.5	Sustainability considerations	164
4.3	Waste Disposal	166
4.3.1	Characteristics and organisation	166
4.3.2	Sources of revenue and value chain elements	172
4.3.3	Competition and regulation	175
4.3.4	Private-sector involvement	176
4.3.5	Sustainability considerations	178

4.4	Energy – Electricity	180
4.4.1	Overview	181
4.4.2	Generation – renewable electricity – cross-sector characteristics	186
4.4.3	Generation – solar energy	191
4.4.4	Generation – wind energy – onshore	193
4.4.5	Generation – wind energy – offshore	195
4.4.6	Generation – hyrdoelectric energy	197
4.4.7	Generation – bioenergy	199
4.4.8	Transmission and distribution	203
4.4.9	Electricity storage	215
4.4.10	Sustainability considerations	228
4.5	Energy – Natural Gas Networks	234
4.5.1	Characteristics and organisation	234
4.5.2	Transmission	235
4.5.3	Storage	236
4.5.4	Distribution	237
4.5.5	Sources of revenue and value chain elements	237
4.5.6	Competition and regulation	238
4.5.7	Private-sector involvement	239
4.5.8	Sustainability considerations	240
4.6	Energy – District Energy Systems (DES)	241
4.6.1	Characteristics and organisation	242
4.6.2	Sources of revenue and value chain elements	244
4.6.3	Competition and regulation	246
4.6.4	Private-sector involvement	247
4.6.5	Sustainability considerations	248
4.7	Social Infrastructure	249
4.7.1	Healthcare facilities	250
4.7.2	Education facilities	253
4.7.3	Administrative facilities	255
4.7.4	Sustainability considerations	256
CHAPTER 5		
	Risks	259
5.1	Risk Management	259
5.2	General Risks	265
5.2.1	Market risk	265
5.2.2	Interest rate risk	269
5.2.3	Exchange rate risk	270
5.2.4	Environmental, social and governance (ESG) risk	270
5.2.5	Political, legal and regulatory risk	277
5.2.6	Force majeure	282
5.3	Project/Asset-specific Risks	283
5.3.1	Planning, construction and completion risk	284
5.3.2	Technical risk	285
5.3.3	Financing risk	287
5.3.4	Syndication risk	288
5.3.5	Operational risk	289

5.3.6	Contractual and counterparty risk	290
5.3.7	Realisation risk	290
5.4	Sector-specific Risks	291
CHAPTER 6		
	Project Finance	295
6.1	Project Finance Basics	295
6.2	Project Finance and PPP	297
6.3	Basic Structure of Project Finance	299
6.3.1	Key characteristics	299
6.3.2	Participants and other stakeholders	302
6.3.3	Objectives and contributions of project participants	308
6.3.4	Typical contractual framework for project finance	310
6.4	Structuring Project Financings – Traditional and in PPPs	312
6.4.1	Phase I – Advisory	316
6.4.2	Phase II – Project assessment	316
6.4.3	Phase III – Risk analysis and allocation	318
6.4.4	Phase IV – Financing	319
6.4.5	Phase V – Implementation and monitoring	324
CHAPTER 7		
	Financing Instruments	327
7.1	Equity	328
7.2	Mezzanine Capital	330
7.3	Debt	331
7.3.1	Senior loans	331
7.3.2	Bonds	334
7.3.3	Short-term finance	339
7.4	Government Support Schemes	339
7.4.1	National development banks	340
7.4.2	European Investment Bank (EIB)	341
7.4.3	European PPP Expertise Centre (EPEC)	343
7.4.4	Governmental export credit and direct investment insurance – ECAs	343
7.5	Asset-backed Securities	344
7.6	Sale and Leaseback	346
7.7	Derivatives	346
7.7.1	Futures	347
7.7.2	Options	348
	Concluding Remarks	349
