

Argentina SA.00507	2007	2007	MINES ARGENTINA S.A.	205 VES Soundings to detect shallow saltwater bearing formations in different Salar areas in Salta (Arizaro, Vega Arizaro, Socompa, Llullaillaco, Rincon).	GEC S.A.
Argentina SA.00610 Lithium Exploration	2010	2011	LITHIUM AMERICAS / EXAR	The VES survey (110 Soundings) was requested to identify and map stratigraphy and geologic structures relative to the occurrence of lithium brine, identify layers that are thought to be representative of lithium-bearing brine and to provide any additional information or interpretations regarding subsurface geology conditions or characteristics of surficial material over the Cauchari-Olaroz Salar area in Jujuy.	GEC S.A.
Argentina SA.01210 Lithium Exploration	2010	2010	LITHIUM ONE S.R.L. / GALAXY	The VES survey (50 Soundings) was requested to identify and map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify layers that are thought to be representative of lithium-bearing brine and to provide any additional information or interpretations regarding subsurface geology conditions or characteristics of surficial material over the Salar del Hombre Muerto area (SAL DE VIDA Project).	GEC S.A.
Argentina SA.01711 Lithium Exploration	2011	2012	ERAMINE SOUTH AMERICA / BOLERA MINERA S.A.	The CSAMT survey (134 Soundings) was conducted for lithium exploration over claims optioned by Bolera Minera in Catamarca and Salta, Argentina. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide information for the selection and design of additional geophysical surveys or the identification of drilling locations. The CSAMT surveys covered the following claims optioned by Bolera Minera: Salar Laguna Verde (Catamarca), Salar Ratones (Salta), Salar Centenario (Salta), Salar Pozuelos (Salta), Salar Pastos Grandes (Salta),	GEC S.A.

Argentina SA.00212 Lithium Exploration	2012	2012	ERAMINE SOUTH AMERICA / BOLERA MINERA S.A.	The CSAMT survey (202 Soundings) was conducted for lithium exploration over the Centenario and Ratones Salar claims optioned by Eramine South America in Salta, Argentina. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide further information for the selection and design of additional geophysical surveys or the identification of drilling locations in these areas.	GEC S.A.
Argentina SA.00512 Lithium Exploration	2012	2012	ERAMINE SOUTH AMERICA / BOLERA MINERA S.A.	The CSAMT survey (19 Soundings) was conducted for lithium exploration over the Carachi Pampa Salar area in Catamarca. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide further information for the selection and design of additional geophysical surveys or the identification of drilling locations in this area.	GEC S.A.
Argentina SA.00113 Lithium Exploration	2013	2013	ERAMINE SOUTH AMERICA / BOLERA MINERA S.A.	The CSAMT survey (44 Soundings) was conducted for lithium exploration over Eramine's Ratones / Centenario Salar claims in Salta. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide further information for the selection and design of additional geophysical surveys or the identification of drilling locations in these areas.	GEC S.A.
Argentina SA.00313 Lithium Exploration	2013	2013	MINERA SANTA RITA	The CSAMT survey (27 Soundings) was conducted for lithium exploration over the MAKTUB Salar claims (Salar del Hombre Muerto) in Salta. The purposes of the survey was to map the stratigraphy and geological structure relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide information for the selection and design of additional geophysical surveys or the identification of drilling locations in this area.	GEC S.A.

Argentina SA.00513 Lithium Exploration	2013	2013	MINERA SANTA RITA	The CSAMT survey (19 Soundings) was conducted for lithium exploration over the Maria Victoria claims over the Salar de Olaroz in Jujuy. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide information for the selection and design of additional geophysical surveys or the identification of drilling locations in this area.	GEC S.A.
Argentina SA.00114 Lithium Exploration	2014	2014	ERAMINE SOUTH AMERICA / BOLERA MINERA S.A.	The CSAMT survey (42 Soundings) was conducted for lithium exploration over the Centenario Salar area in Salta. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide information for the selection and design of additional geophysical surveys or the identification of drilling locations in this area.	GEC S.A.
Argentina SA.00214 Lithium Exploration	2014	2014	ERAMINE SOUTH AMERICA / BOLERA MINERA S.A.	The CSAMT survey (85 Soundings) was conducted for lithium exploration over the Ratones Salar area in Salta. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide information for the selection and design of additional geophysical surveys or the identification of drilling locations in this area.	GEC S.A.
Argentina SA.00415 Lithium Exploration	2015	2015	ERAMINE SOUTH AMERICA / BOLERA MINERA S.A.	The CSAMT survey (68 Soundings) was conducted for lithium exploration over the Arizaro Salar area in Salta. The purposes of the survey was to map the stratigraphy and geological structures relative to the occurrence of lithium brine, identify conductors that are thought to be presentative of lithium bearing brine and to provide information for the selection and design of additional geophysical surveys or the identification of drilling locations in this area.	GEC S.A.
