[PechaKucha presentations](#) are a form of presenting ideas using visuals. Using a software like PowerPoint, presenters create a presentation with 20 slides consisting solely of images. Slide transitions are timed to happen every 20 seconds. Each presentation, therefore, takes 6 and half minutes to present. The presenter talks while the presentation is showing behind them. For those in more visual fields, Pecha Kucha presentations can be an excellent way to demonstrate and share your work with the public in a quick and engaging way.

To submit your presentation send a 200 word description of your research and resume to [MACAA18@unl.edu](mailto:MACAA18@unl.edu)
