

Why leasing is the smart choice for your office furniture project

- **Payments are 100% tax allowable**

If you lease your office furniture project, payments are 100% tax allowable which means they can be set against company profit. This makes leasing the most tax efficient method of financing your office furniture, and is also the **only method by which a project can be totally offset against taxable profits.**

- **Fixed payments for accurate budgeting and forecasting**

Unlike other methods of finance such as floating rate bank loans and overdrafts, payments are fixed for the duration of the lease period allowing you to budget effectively and with certainty. It also provides you with a hedge against inflation.

- **Get the right solution now**

By spreading the cost over 3, 4 or 5 years you can acquire the solution that fully meets your needs now, rather than being restricted by your current capital budget.

- **Ease cashflow**

In most cases we can arrange a lease facility with no deposit, having little impact on your cash flow.

- **Preserve borrowing power**

Leasing means you preserve your existing bank credit lines, without compromising future working capital, leaving them available for future business development or investment purposes.

Why choose Plus Finance?

Plus Finance specialises in arranging finance for customers buying office furniture and refurbishing their working environments. We are the UK's market leader in this particular arena and our team has over 20 years experience working within the furniture and interiors market. Plus Finance will work with you to achieve the most cost effective and tax efficient way of financing a brand new office environment.
