

Name:

Date:

Attempt: #

1. What is the difference between displacement and velocity? Explain and give examples.
2. What is the difference between speed and velocity? Explain and give examples.
3. What is the difference between velocity and acceleration? Explain and give examples.
4. Can you tell an object's direction of travel from its velocity? Can you tell from its acceleration? Explain and give examples.
5. What is the difference between final position and displacement? Explain and give examples.
6. What is the difference between average velocity and final velocity? Explain and give examples, and describe how you can find both quantities on a position-time graph.
